EXPERIENCE

Fulcrum Retail Solutions

Remote

Freelance

July 2026 - september 2026

- Designed the end-to-end UI/UX for a 4-part product suite for a retail CRM startup, spanning a business-owner app, a neighborhood app, and a multi-login web platform for admins and sales advisors.
- Built the admin dashboard, sales-advisor portal, and landing page using Next.js, Supabase, and Google OAuth, and contributed to development across both mobile apps.

Cavin Infotech Private Limited

Remote

Intern

June 2026 - July 2026

- Partnered with stakeholders to translate business requirements into a redesigned Products experience, structuring product narratives and CTAs to drive lead generation and client-call bookings.
- Conducted competitor analysis and secondary research across 4 CRM platforms, surfacing 7 feature gaps and usability friction points through root-cause analysis that directly informed product positioning.

KeyNcoders

Remote

Intern

July 2025 - October 2025

- Shipped an end-to-end platform redesign (wireframes, prototypes, design system) that grew weekly visitors 3x, from 1000 to 3000, applying accessibility standards to lift usability and consistency.
- Refactored information architecture, optimized interaction, improved user flow and reduced friction across the platform.

Google Developer Groups on Campus

VIT Chennai

UI/UX Lead

June 2025 - July 2026

- Promoted to UI/UX Lead after 2 years of contributions; led design for 3 major event websites, including the **DevsHouse National Hackathon** (1000+ participants from 50+ colleges), achieving a 25% increase in registrations.
- Conducted a 6-hour Figma workshop for 100+ participants & mentored 10+ junior designers to improve design quality.

PROJECTS

Ripple - Serverless AI Platform (Link)

Node, React, AWS Lambda, SQS, PostgreSQL, RAG

- Architected a serverless backend (AWS Lambda + SQS) powering AI interview workflows resume evaluation, transcript analysis & mock interviews with idempotent workers and DLQs for fault tolerance under concurrent load
- Engineered an agentic framework where specialized LLM agents score resumes and responses against configurable rubrics, persisting evaluations to surface longitudinal insights via analytics dashboards.
- Built a RAG pipeline with pgvector semantic search on user-uploaded artifacts, per-user data isolation via JWT/ OAuth

Aletheia - AI Misinformation Detection (Link)

React, Vite, TypeScript, Tailwind CSS, Figma

- Translated complex model outputs (bias detection, manipulative-technique tagging) into a role-specific interface delivering real-time credibility score, closing the gap between what the model knew and what a non-technical user didn't.
- Shipped a responsive frontend (React, Vite, TypeScript) deployed on Vercel, prioritizing scannability and trust cues so users could interpret credibility signals at a glance.

CareerBot - Automated Job Tracking Data Pipeline (Link)

Python, Telegram API, Google sheets

- Scoped and shipped independently: an automated Python pipeline scraping 6 job boards, deduplicating and ranking listings, and delivering top-10 match alerts via a Telegram bot.
- Built a self-updating, deduplicated tracker replacing manual workflows with a 24/7 autonomous system.

EDUCATION

Vellore Institute of Technology, Chennai

Aug 2023 - Present

B.Tech in CSE (AI & Robotics), CGPA: 8.57

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C, C++, Java

Backend & Cloud : AWS (Lambda, API Gateway, SQS), REST APIs, Microservices, Serverless, Distributed Systems, PostgreSQL (pgvector), RAG, LLM API Integration, Machine Learning, Image Classification, Web Scraping

Frontend & Tools : React, Next.js, Tailwind CSS, Git/GitHub, Unit Testing, Figma
